## Skills

**Frontend:** React.js, Next.js, TypeScript, JavaScript, Tailwind, HTML, CSS

**Mobile:** React Native

**State Management:** Redux, Zustand, Context

**Backend:** Node.js, Express,

**Tools:** Git, GitHub, CI/CD, Figma, Docker, Vite

**Testing:** Jest, Vitest, React Testing Library

**Other:** AI, UI/UX, Azure, AWS

## Languages

- Danish – PD3
- English
- Kurdish
- Farsi

## Profile

Forward-thinking frontend developer specializing in React, Next.js, and TypeScript. I craft clean, scalable, and high-performance web and mobile experiences with a strong focus on usability and developer ergonomics. Equally comfortable collaborating in agile, cross-functional teams or working independently to deliver high-quality solutions.

## Experience

2024-2025      Frontend Developer | TrialSync

Copenhagen

Led frontend development using Next.js, TypeScript, and Tailwind CSS.

Collaborated with UX/UI designer and backend developer to deliver scalable, user-centered, enterprise-grade applications aligned with both business and technical objectives.

Developed reusable components, custom hooks with React Query, implementing pagination and code-splitting to optimize performance.

Integrated user feedback to enhance UI/UX, significantly improving usability and engagement for clinical trial platforms. Actively participated in Agile stand-ups and technical discussions, proposing solutions to reduce technical debt and improve frontend architecture.

2020-2023      Independent Learning & Projects

Virum

Led the development of 15+ frontend and full-stack applications using React, React Native, and Next.js, delivering highly responsive user interfaces backed by scalable Node.js, Express, and MongoDB solutions. Integrated RESTful APIs and TanStack Query to ensure performant, real-time data synchronization.

Strengthened codebase reliability through unit testing and test-driven development practices using React Testing Library.

2016-2024      Electrical Engineer | Grafisk Maskinfabrik

Birkerød

Provided technical support and developed custom scripts. Worked on embedded software and system automation.

## Education

2023-2023      Full-stack web development | Hack Your Future

Copenhagen

JavaScript, React, Node.js and MySQL were key components of my education.

2013-2016      MSc in Electrical Engineering | DTU

Lyngby

Specialize in power systems as the primary focus area.
