ONLINECITY.IO

Dear team

I am excited to apply for the Frontend Web Developer position. With over two years of professional experience in web development, I have built modern, responsive interfaces using React, TypeScript, and Tailwind CSS, and I enjoy bringing both design and functionality together.

I am passionate about writing clean, maintainable code, and I value quality through testing, reviews, and documentation. My experience with REST APIs, GraphQL, and Docker, along with an understanding of UX and good software architecture, makes me confident I can contribute effectively across your platforms.

I am especially drawn to your strong focus on teamwork, automation, and delivering high-quality solutions for customers of all sizes. I thrive in collaborative environments and enjoy working closely with designers, backend developers, and marketers to create seamless user experiences.

I look forward to hearing from you.

Best regards
Arash Abdollahi
